

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999), and the number of people in the public sector who are employed in health care has increased by 1.1 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care provided by the public sector, and this has led to a number of initiatives to improve the quality of care provided by the public sector. These initiatives include the introduction of new standards of care, the introduction of new methods of monitoring and evaluation, and the introduction of new methods of financing care.

The introduction of new standards of care has led to a number of initiatives to improve the quality of care provided by the public sector. These initiatives include the introduction of new standards of care, the introduction of new methods of monitoring and evaluation, and the introduction of new methods of financing care.

The introduction of new methods of monitoring and evaluation has led to a number of initiatives to improve the quality of care provided by the public sector. These initiatives include the introduction of new standards of care, the introduction of new methods of monitoring and evaluation, and the introduction of new methods of financing care.

The introduction of new methods of financing care has led to a number of initiatives to improve the quality of care provided by the public sector. These initiatives include the introduction of new standards of care, the introduction of new methods of monitoring and evaluation, and the introduction of new methods of financing care.

The introduction of new standards of care has led to a number of initiatives to improve the quality of care provided by the public sector. These initiatives include the introduction of new standards of care, the introduction of new methods of monitoring and evaluation, and the introduction of new methods of financing care.

The introduction of new methods of monitoring and evaluation has led to a number of initiatives to improve the quality of care provided by the public sector. These initiatives include the introduction of new standards of care, the introduction of new methods of monitoring and evaluation, and the introduction of new methods of financing care.
